

**PROTECTING YOUR
VEHICLE HAS NEVER BEEN
EASIER OR BETTER!**

We trust your Carcoon storage unit is serving you well.

To ensure the system operates at its optimum it is recommended that the outer dust filters are washed in warm soapy water at least every six months and the inner Carbon filters should be replaced every 8000hrs or every two years depending upon usage, your Carcoon is now due for the Carbon filters to be replaced.

Cutaway section showing outer dust filter, primary filter and inner Carbon filter
